AURATON

CARINA WIFI

Weekly, multifunctional Wi-Fi socket thermostat

AURATON Carina WIFI is a weekly, multifunctional Wi-Fi socket thermostat that allows you to set the temperature with minute precision. The thermostat has a Wi-Fi module and works with the Tuya Smart and Smart Life applications.

The AURATON Carina WI-FI thermostat allows you to regulate the temperature of heating and air conditioning devices in the range of 5 °C to 35 °C. The socket thermostat only requires plugging it between the heating or air conditioning device and the power socket and setting the desired temperature. The integrated sensor is used to measure the actual room temperature and allows for appropriate control of the heating or air conditioning device.

Control via electrical socket

Manual on/off function

On/off programs

Screen state and program memory after power failure

TECHNICAL DATA

Power supply	230V AC, 50Hz, 1.5W
Operating temperature range	0 - 50°C
Working cycle	weekly
Load	max. 16 A (res), max. 6 A (ind)
Ingress protection	IP 20
Humidity	≤85% bez kondensacji
Suggested mounting place	electric socket
Dimensions (mm)	140 x 67 x 40
